AUTOMOTIVE INDUSTRY

RECOMMENDED SYSTEM – Hychem Motortuff 3mm Trowelled, 5 layer, Floor Protection System

Motortuff is a proven contender in the Automotive flooring industry, having a long streak of successful floor installations spanning over 25 years.

When applied to **Profloor's** stringent preparation methods, the floor surface can well exceed a 10 year service life with little to no maintenance.

Unlike standard epoxy coatings, **Motortuff** is specifically designed to meet the physical demands of the Automotive industry. These include:

Slip Resistant - Complies with the most current Australian Standards: P4 rating

Impact & Wear Resistant – due to the thickness and high strength, the impact resistance is increased, minimising damage when tools or equipment are dropped onto the surface

Oil and Chemical Resistant– Resistant to a wide range of Oils, Solvents and Chemicals, Commonly used in the Automotive Industry

Easy to clean – The entire system is completed with a UV Stable, clear glaze coating, to ensure that all spills can be easily wiped away

CASE STUDY

MAZDA CAMPBELLTOWN NSW

Profloor had been approached by a prominent Automotive Construction specialist, to provide the specified Motortuff system to suit their tight budget and construction program.

The scope included the reinstatement of expansion jointing and concrete pits, manufacture of containment bunds to all external doorways, installation of coving to all perimeter walls, and the final installation of the 5 layer Motortuff system.
